Graphs of Sine and Cosine, Part 2 (5.2) Name ____________________

Circuit

Begin with the problem in the top left. Answer the question. To advance in the circuit, find your answer and write "2" in the blank. Solve that problem, find your answer and write "3" in the blank and so on until you have solved every problem and returned to the beginning.

ANSWER: -6 # ______ State the period of $y = 2\sin(3x)$.	ANSWER: 3 # ______ State the minimum value of $y = 4\cos(2x) - 1$.
ANSWER: $\frac{\pi}{2}$ right # ______ State the amplitude of $y = 4\cos(2x) - 1$.	ANSWER: 4π # ______ State the amplitude of $y = -7\sin x$.

ANSWER: $\dfrac{2\pi}{3}$

_______ State the phase shift of $y = \sin\left(x - \dfrac{\pi}{2}\right)$.

ANSWER: 2

_______ State the period of $y = 3\sin\left(\dfrac{x}{2}\right)$.

ANSWER: $y = -1$

_______ State the maximum value of $y = 4\cos(2x) - 1$.

ANSWER: 7

_______ State the vertical shift of $y = \cos x - 6$.

ANSWER: 4

_______ State the midline of $y = 4\cos(2x) - 1$.

ANSWER: -5

_______ State the period of $y = \cos(\pi x)$.
